

SCEPTER® brass & nickel cover plates

The Scepter® line of brass and nickel plated covers for round floor boxes help to protect enclosed power data and communications wiring from daily environmental floor conditions such as mopping (UL scrub water tested) and foot traffic (UL approved for cover loading).

The covers feature a light lacquer finish for extra strength and durability in high traffic areas and include a rubber gasket and aluminum backing plate to create a water-tight seal. The flush mount cover plates should be installed to the floor box using the LRA-U.

Easy to use, brass and nickel cover plates are available in a variety of styles.

	Description	Plated Material	Part Number	Product Code
1	Duplex receptacle cvr w/ dual flip lid	Brass	DFL-2	178096
		Nickel	DFL-2-N	178279
