

CONDUIT REPAIR KITS

PRODUCT INFORMATION BULLETIN

EPR Kits feature improved UV resistance and color!

These clever and innovative conduit repair kits from IPEX offer fast and easy repairs for damaged conduit caused by actions such as earth excavation, horizontal and core drilling.

Designed with a unique interlocking joint, the EPR Kits' two half shell, bell by bell pieces simply close around the installed wire and cable. Using standard PVC solvent cement, EPR Kits are quickly and easily assembled and connected, restoring the conduit to its original form. And, unlike other conduit repair systems, EPR Kits are capable of repairing various lengths and types of pipe quickly and accurately, saving you time and money.

BENEFITS:

- Restores structural integrity of conduit system
- Cost savings with fast and easy installation
- Compatibility – inside diameter of bell equals outside diameter of pipe to create a bell and spigot connection

NEW!!! EPR Kits now feature a new color and offer enhanced UV resistance. Manufactured from high-impact and non-conductive PVC, the EPR Kits now closely match the color of our conduit and fittings. New product codes have been created to accommodate this change. Please refer to the table on the reverse.

– EPR Kits available in 1-1/4" to 6" sizes –
