

6 TOP REASONS Engineers Choose AquaRISE® POTABLE WATER PIPING SYSTEMS

SCAN TO WATCH
WHAT OUR CUSTOMERS
HAVE TO SAY

AquaRise® is a hot and cold potable water distribution system for commercial, industrial and high buildings and is fully-approved for non-combustible applications.

01

CODE COMPLIANCE

AquaRise pipe, fittings and solvent cements are certified to CSA B137.6, applicable ASTM standards and all components are listed to NSF 61.

02

INCREASED FLOW CAPACITY

Larger inside diameter compared to most other piping systems.

03

CORROSION RESISTANCE

Excellent resistance to high chlorine content at elevated temperatures.

04

LOW THERMAL CONDUCTIVITY

Lower thermal conductivity can reduce the need for insulation.

05

LONG-TERM RELIABILITY

Superior durability ensures better and longer performance with lower maintenance cost.

06

IPEX BUILDING INFORMATION MODELING (BIM) FILES

Quick, easy family downloads that meet all applicable standards and expectations.
